Connector Range

Lugs	Up to 1033 MCM Stranded
Splices	477 ACSR

Features

- Protective Rubber Boot on "C" Head

The **EP-510HK** is a Kearney style tool which accepts PH-2, WH-2, and WH-3 style dies. It has 12 tons of output and is used for crimping up to 750 MCM lugs or splices. An external 10,000 psi pumping source is needed to develop 12 tons of compression force. The EP-510HK comes complete with a 3/8" male, screw type coupler and carrying case.

NOTE: When using any of these high-pressure tools, always use 10,000 psi rated non-conductive hose (NC-16 series).
