The newly developed **IL-ND** streamline tool was designed as an upgrade to the ECO-EZ tool giving the user a more robust product with a true 3 year life cycle.

Enhancements to the hydraulic system, a more robust heavy duty motor similar to the "SL" tool as well as a re-designed compression head that utilizes less hydraulic force while delivering a 6 ton output compression force, are just a few of the design implementations used in this new series. We have also added a rubber over-mold to the housing that will allow the operator better tool control with the non-slip grip, as well as an updated aesthetic look, separating it from the competition.
