TOOLS**

A SPARTACO COMPANY

# REC-B6510

12 Ton Compression Tool with 1.65" Jaw Opening

## HuskieToolFacts

[www.spartacogroup.com](http://www.spartacogroup.com)

### Specifications

Output	12 Ton
Weight	15.9 lbs. with Battery
Size	17.8"L x 11.1"H x 3.3"W
Jaw Opening	1.65"

### Crimping Estimates

	BP-84
4/0 Cu	90
500 MCM Cu	60

### Connector Range

Lugs and Splices	Up to 750 MCM Cu/Al
------------------	---------------------

### Features

- One Hand Operation
- Tested Up to 75kV
- Rotational Head
- Bright White, LED Lights for Working in Low Light Conditions
- Rapid Advance
- Ergonomically Designed for Balance and Grip
- Weather Resistant Housing
- Audible Bypass when Predetermined Pressure is Achieved
- Protective Rubber Boot on "C" Head For Brush Contact
- 5 Year Warranty on Tool, Battery & Charger

The **REC-B6510** was specifically designed for use in single-handed operation in overhead applications such as cable trays. This allows one hand to control the work while the other hand is free to operate the tool. It also eliminates the cumbersome hoses and larger, heavier tools traditionally used in overhead work.

The REC-B6510 has the same jaw opening as our REC-3510 battery operated 12-ton compression tool. The opening is 1.65" which will accept mid-span copper and aluminum splices and lugs up to 750 MCM Cu/Al. This tool accepts all "U" type dies available on the market.

Portability and handling are made easier because the REC-B6510 system is self-contained and compact. The new rapid advance system reduces tool run time, giving you more crimp cycles per battery charge. A built-in, pre-set 10,000 psi bypass cartridge will audibly "bypass" when the optimal pressure is achieved.

These tools are able to communicate data to your Bluetooth enabled PC via the downloadable software available on Spartaco website.

In addition to the audible beeps and visual Led indicators on these tools identifying battery connection, full compression cycles, proper achieved pressure, and incomplete crimps, the tools also record data to be viewed later via the Bluetooth connection at you PC.
