The **REC-B6NDSL** has a choice of jaw types, including six compression heads, the SLXPJ-JAW, SLXMJ-JAW, SLK-JAW, SLND3-JAW, SLO-JAW, or SLBG-JAW. For cutting, switch to the SLGW-JAW, SLCUT-JAW, SL-CHCUAL, or SL-CHACSR, and for bending, use the SLCB-JAW. Quickly change between head types with the pull-pin design. No need for another battery system, as this tool operates on the same 14.4 volt battery used in all of the battery operated tools. The SL-ND Streamline tool not only carries a 5 year warranty on the tool but on the battery and charger as well.

In addition to the rapid advance feature incorporated into the new REC-6NDSL, it also has an electronic counter that allows a service technician to read the number of compression cycles. Also, the tool housing has been reinforced to improve durability during heavy field use.
