The **REC-SB624CC** was designed to cut the toughest steel used in construction today. It can replace an entire tool kit, including several sizes of conventional bolt cutters, hacksaw, acetylene torches and cable cutters. The REC-SB624CC was designed from the same hydraulic system as the REC-658U featuring a rapid advance ram for reduced cycle times.

The specially designed anvil style blades were made to cut EHS up to 9/16" and with the pull of the trigger, you can cut ACSR cables up to 477 MCM, standard guy wires to 5/8", and ground rods to 5/8". The specially designed flip-top latch and rotating head provide exceptional ease of use and maneuverability in tight working quarters.

The REC-SB624CC has an overload bypass, which will "kick out" when tool reaches 8 tons or is attempting to cut cables beyond its capacities.
