HuskieToolFacts

Specifications

Output	10 Ton
Size	4"W x 15"H x 8"L
Jaw Opening	2.3"

Cutting Estimates

	BP-84
1000 MCM Cu	25
1500 MCM Al	30

Cutting Capacities

Aluminum	1500 MCM
Copper	1000 MCM
ACSR	Do Not Cut

Features

- Improved Ergonomic Handle
- 2.3" Jaw Opening
- One Hand Operation
- Safety Lockout Switch
- Upgraded Motor and Gear System
- 5 Year Warranty on Tool, Battery & Charger

The **REC-Y60ACM** was designed to cut stranded copper cables and aluminum.

The REC-Y60ACM comfortably fits into the lineman's gloved hand, and repetitive ratcheting movement is entirely eliminated. We have rotated the handle 90° to the blade to achieve a more ergonomic and comfortable cutting position. Just a squeeze of the trigger is all it takes to make a cut and almost no muscle power is needed. As a result, the risk of sprains, strains, and lost time due to muscle related injuries can be significantly reduced.

The moveable blade has wide gear teeth for extra power and full cutting traction. Gear guides are attached on both ends of the movable blade to align the gear teeth with the internal pinion gear.

*Consult factory for 1000 MCM copper and above.
