- Rotational Head
- Rubber Boot on Compression Head
- Rapid Advance
- Bright White, LED Lights for Working in Low Light Conditions
- Audible Bypass when Predetermined Pressure is Achieved
- 5 Year Warranty on Tool, Battery & Charger
The new 6 series battery operated tools with "B" designation are Bluetooth enabled products.

These tools are able to communicate data to your Bluetooth enabled PC via the downloadable software available on Spartaco website.

In addition to the audible beeps and visual Led indicators on these tools identifying battery connection, full compression cycles, proper achieved pressure, and incomplete crimps, the tools also record data to be viewed later via the Bluetooth connection at you PC.

The data includes locked fields for model and serial number of the tool connected. It has cycle count data, and it has fields for read / write capabilities for the user to enter notes such as truck or job number, repair history, or any note the user or maintenance technician may feel important to record.

Complete operation instructions as well as the downloadable computer software is available at: www.spartacogroup.com

The **SL-BC510** has all the same features as the SL-B510 but replaces the latched head design with a "C" head. The capacity of the tool is the same as the pistol grip REC-6510, capable of accepting lugs up to 750MCM, and splices up to 600 MCM.

The new housing design incorporates a rubber over-mold handle grip area allowing the operator better tool control. If you are looking for a streamline tool that incorporates the "C" head design, the SL-BC510 is the perfect addition to any utility truck.
